

FRUBO Product Description

Silky Microporous 2-Sided 275g/m²

This premium photographic quality inkjet paper is a double-sided symmetrically resin coated (RC) media with a professional silk finish. Designed for high end photo printing using both dye and pigment inks, this heavy-weight media is optimized for high speed printing and provides the look and feel of a real photograph. FRUBO's SILKY MICROPOROUS 2-SIDED features a natural photographic white surface and the reproduction of the entire colour space, in particular, the natural reproduction of skin tones.

Best for

- Real Photo albums
- Photobooks
- Portfolios
- Premium quality invitation cards

The coating makes the difference...

FRUBO's SILKY MICROPOROUS 2-SIDED inkjet paper is made from the same base resin coated (RC) used in professional photographic paper. The latest porous technology coating it employs means instant drying straight from the printer and reproduction of tones that are rich and consistent. As a consequence, FRUBO presents:

- Professional silk finish
- Instant dry microporous surface
- Superb imaging performance
- Excellent photographic image quality and consistency
- Heavyweight look and feel of a real photograph
